Start	Early This Morning
Peak	This Afternoon and Evening Snowfall rates of 1.0"+ per hour possible.
End	This Evening Snow will taper to scattered light showers by late evening

Probability of achieving 10 inches total accumulation

Character of Snow	Wet 	Normal	Dry
--------------------------	----------------	---------------	------------

Risk Assessment/Potential Impacts

	Power Outage Potential	Blowing/ Drifting Potential	Total Winter Hazard Risk Assessment
Extreme			Red
High			Yellow
Moderate			Yellow with checkmark icon
Low	Black circle with white checkmark icon	Black circle with white checkmark icon	Green

Potential Impacts

- Roads will become snow covered and slippery, especially as temperatures drop this evening
- Warm pavement temperatures will lessen snow accumulation on roads (compared to grass)
- Statistics show that early season snow causes more accidents
- Steady snow will last 6 to 9 hours

Total Winter Hazard Risk Assessment Definitions:

Extreme:

- Historic Weather Hazard/Event
- Life Threatening
- Total disruption of daily life
- Recovery Time: days to one week

High:

- Rare Weather Hazard/Event
- Potentially Life Threatening
- Widespread disruption of daily life
- Recovery Time: hours to a day

Moderate:

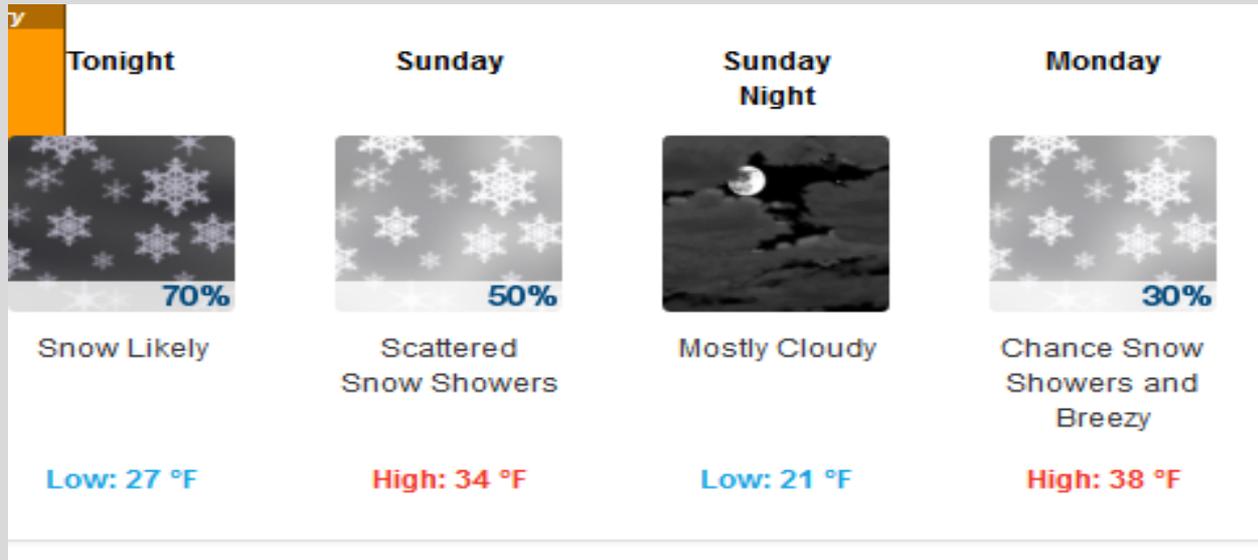

- Occasional Weather Hazard/Event
- Rarely directly life threatening
- Some disruption of daily life
- Recovery Time: +/- 6 hrs of when weather ends
